TROPICAL CYCLONE BULLETIN NR. 2
Super Typhoon INDAY (BAVI)

Issued at 5:00 AM, 08 July 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

SUPER TYPHOON INDAY IS NOW INSIDE THE PHILIPPINE AREA OF RESPONSIBILITY (PAR).

Location of Center (4:00 AM)

The center of the eye of Super Typhoon INDAY was estimated based on all available data at **1,405 km East of Northern Luzon (16.8°N, 134.9°E).**

Intensity

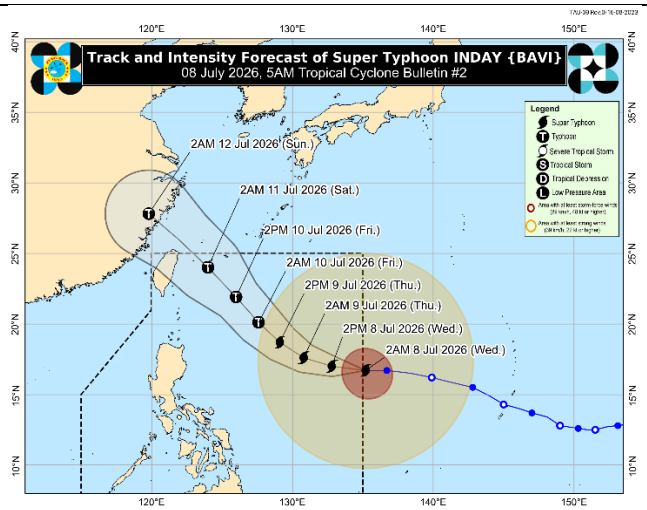
Maximum sustained winds of **185 km/h** near the center, gustiness of up to **230 km/h**, and central pressure of **930 hPa.**

Present Movement

Westward at 25 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **900 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 PM 08 July 2026	17.0	132.8	1,185 km East of Northern Luzon	185	STY	W 20
24-Hour Forecast 2:00 AM 09 July 2026	17.6	130.8	960 km East of Northern Luzon	185	STY	WNW 20
36-Hour Forecast 2:00 PM 09 July 2026	18.7	129.1	805 km East of Extreme Northern Luzon	185	STY	NW 20
48-Hour Forecast 2:00 AM 10 July 2026	20.1	127.6	590 km East of Basco, Batanes	175	TY	NW 20
60-Hour Forecast 2:00 PM 10 July 2026	21.9	126.0	450 km East Northeast of Itbayat, Batanes	175	TY	NW 20

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Batanes, Cagayan including Babuyan Islands, the northern and central portions of Isabela** (Santo Tomas, Aurora, Santa Maria, Quezon, San Mariano, Naguilian, Dinapigue, Roxas, Luna, Delfin Albano, City of Cauayan, San Pablo, Ilagan City, Benito Soliven, Tumauini, Cabagan, Reina Mercedes, San Manuel, Palanan, Cabatuan, Quirino, Divilacan, Gamu, Mallig, Maconacon, Burgos, San Guillermo, Angadanan, Alicia, San Mateo), **Apayao, the eastern portion of Kalinga** (Pinukpuk, City of Tabuk, Rizal)**, the northern portion of Aurora** (Dilasag)**, and the northern and central portions of Catanduanes** (Pandan, Caramoran, Bagamanoc, Panganiban, Viga, Gigmoto, Baras, San Miguel)	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 7 issued at 5:00 AM today** for the heavy rainfall outlook due to TC INDAY and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that may be hoisted throughout INDAY's passage is Wind Signal No. 2 or 3.

The enhanced Southwest Monsoon and the periphery of Super Typhoon INDAY will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Pangasinan, Zambales, Bataan, CALABARZON, most of MIMAROPA, Bicol Region, most of Visayas, and most of Mindanao.
- **Tomorrow (09 July):** Most of the country.
- **Friday (10 July):** Most of the country.

Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning will be issued today over the northern and eastern seaboards of Luzon and Visayas.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 4.5 m**: The seaboard of Isabela; the northern seaboard of Aurora; the northern and eastern seaboards of Catanduanes; the eastern seaboard of Northern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern and eastern seaboards of Batanes and Polillo Islands; the eastern seaboards of Cagayan, Albay, Sorsogon, Eastern Samar, and Dinagat Islands; the remaining seaboard of Aurora; the northern seaboards of mainland Quezon, Camarines Norte, Camarines Sur, and Northern Samar.
- **Up to 3.5 m:** The remaining seaboards of Batanes and Cagayan; the eastern seaboards of Bucas Grande-Siargao Islands, and Surigao del Sur; the eastern and southern seaboards of Davao Oriental.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The southern seaboard of Southern Leyte; the remaining seaboards of Surigao del Norte; the southeastern seaboard of Davao Occidental; the northern and western seaboards of Kalayaan Islands.
- **Up to 2.0 m:** The southern seaboard of Bohol; the northern seaboard of Camiguin; the remaining seaboards of Kalayaan Islands.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- INDAY has entered the Philippine Area of Responsibility (PAR) and is forecast to move generally westward over the next 24 hours. It will then turn northwestward while remaining over the Philippine Sea and may be nearest to Extreme Northern Luzon by Friday (10 July) before heading towards the southern islands of Japan and the sea north of Taiwan. INDAY is forecast to exit the PAR by Saturday (11 July) and make landfall over the eastern coast of mainland China by Sunday (12 July).
- INDAY will maintain its strength as a super typhoon until tomorrow (09 July), and will downgrade into a typhoon by tomorrow afternoon or evening. Afterwards, it will gradually weaken. Nevertheless, it will likely remain a typhoon throughout the remaining forecast period.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
